

# **CONTENTS**

## **for *Cancer and Natural Medicine***

<b>Preface</b>	<b>xiii</b>
<b>1. Introduction</b>	<b>1</b>
Cancer Incidence and Mortality	
The Use of Complementary Medicine by Cancer Patients	
The Clinical Efficacy of Complementary Medicine in Treating Cancer	
Research on Complementary Medicine	
Summary	
<b>2. Initiation, Proliferation, and Cell Death</b>	<b>5</b>
Cell Initiation: Cancer Initiation and DNA damage, Viruses, Radiation, Chemical Carcinogens	
Cell Growth: Cell Proliferation, Differentiation, and Tumor Growth	
Cell Death: Apoptosis vs. Necrosis, Apoptosis and Cancer, Natural Agents that Stimulate Apoptosis	
Summary	
<b>3. Angiogenesis</b>	<b>15</b>
The Mechanics of Angiogenesis	
Angiogenic Factors	
Angiogenic Factors and Neoplasia	
Natural Agents that Inhibit Angiogenesis	
Neovasculature as an Anticancer Target	
Summary	
<b>4. Invasion</b>	<b>32</b>
Connective Tissue, Proteases, and the Extracellular Matrix	
Proteases and Protease Inhibitors in Neoplasia	
Natural Agents that Facilitate Collagen Production	
Summary	
<b>5. Metastasis</b>	<b>37</b>
The Mechanisms of Metastasis	
Cell Detachment and Intravasation	
Migration Through the Circulation	
Cell Arrest at a New Location	
Extravasation	
Induction of Angiogenesis	
Summary	
<b>6. Humoral Factors that Affect Neoplasia</b>	<b>43</b>
Sex Hormones	
Eicosanoids	

Growth Factors  
Summary

- |   |            |
|---|------------|
| <b>7. Effects of pH on Neoplasia</b>  | <b>52</b>  |
| The Regulation of pH  |            |
| Cell Proliferation and pH   |            |
| Low pH Treatments   |            |
| High pH Treatments  |            |
| Summary   |            |
| <b>8. The Immune System</b>   | <b>58</b>  |
| Overview of the Immune System   |            |
| Immunity and Cancer   |            |
| Cancer Immunotherapy  |            |
| Natural Agents that Stimulate the Immune System   |            |
| Natural Agents that Suppress the Immune System  |            |
| Summary   |            |
| <b>9. Treatment of Cancer by Conventional Medicine</b>  | <b>80</b>  |
| Treatment Modalities: Radiotherapy, Surgery, Chemotherapy   |            |
| Survival and Mortality: Mortality rates, Relative Survival Rates  |            |
| Summary   |            |
| <b>10. The Theory of Traditional Chinese Medicine</b>   | <b>90</b>  |
| Introduction  |            |
| Elements of Traditional Chinese Medicine: The Eight Principles, Qi, Blood, Phlegm, Toxins, the Twelve Channels, the Twelve Organs |            |
| Diagnosis in Traditional Chinese Medicine   |            |
| Causes of Disease   |            |
| Symptom Patterns and Cancer   |            |
| Clinical Use of Chinese Herbs   |            |
| Summary   |            |
| <b>11. Antitumor and Anticancer Effects of Botanical Agents</b>   | <b>105</b> |
| Investigations of Plant Extracts at the National Cancer Institute   |            |
| Antitumor Compounds Selected for Advanced Development in China  |            |
| Antitumor Compounds of Interest   |            |
| Chinese Herbs that Exhibit Antitumor Activity   |            |
| Chinese Herbs that Exhibit Anticancer Activity  |            |
| Summary   |            |
| <b>12. Dietary Macronutrients and Their Effects on Cancer</b>   | <b>129</b> |
| Types of Dietary Fat  |            |
| Mechanisms By Which Dietary Fats May Promote Cancer   |            |
| Mechanisms By Which Dietary fats May Inhibit Cancer   |            |

Macronutrients Other Than Fats Summary	
<b>13. Dietary Micronutrients and Their Effects on Cancer</b>	<b>142</b>
Vitamins	
Metals: Selenium, Zinc, Calcium	
Summary	
<b>14. Dietary Non-nutrient Factors and Their Effects on Cancer</b>	<b>148</b>
Non-nutrient Anticarcinogens	
Phytoestrogens	
Phytosterols and Saponins	
Flavonoids	
Protease Inhibitors	
Isoflavones	
Lignans	
Summary	
<b>15. Other Natural Agents</b>	<b>161</b>
DMSO	
Cartilage: Bovine Cartilage, Shark Cartilage	
Digestive Enzymes	
Urea	
Summary	
<b>16. Physical and Psychological Therapies</b>	<b>169</b>
Physical Therapies: Acupuncture, Electrotherapy	
Psychological Therapies: Western Psychology, Eastern Psychology	
Summary	
<b>17. Conducting Research on Natural Agents</b>	<b>176</b>
Research Design	
Summary of Promising Agents	
Discussions on Individual Agents	
Multiagent Approach to Treatment	
Laboratory Analysis	
Summary	
<b>Appendix A: List of Chinese Herbs</b>	<b>199</b>
<b>Appendix B: Herbal Formulas Mentioned In Text</b>	<b>208</b>
<b>Appendix C: Cancer Incidence and Survival Data</b>	<b>211</b>
<b>Appendix D: Studies on Platelet Aggregation and Fibrinolysis</b>	<b>214</b>

<b>Appendix E: Natural Agents that Affect cAMP Levels</b>	<b>216</b>
<b>Appendix F: Compounds Showing Cytotoxic or Antitumor Activity in Chinese Studies</b>	<b>217</b>
<b>Appendix G: Herbal Products with Reported Antitumor or Anticancer Effects</b>	<b>220</b>
<b>Appendix H: Overview of Selected Cancers</b>	<b>224</b>
<b>Appendix I: Overview of Common Research Designs</b>	<b>241</b>
<b>Appendix J: Less Promising Natural Agents</b>	<b>248</b>
<b>Appendix K: Derivation of Concentration-time Curves for Rhein and Emodin</b>	<b>254</b>
<b>Appendix L: Radiotherapy and the Use of Antioxidants</b>	<b>260</b>
<b>References</b>	<b>262</b>
<b>About the Author</b>	<b>300</b>
<b>Index</b>	<b>301</b>
